

English

This term we will be focusing on writing to entertain with our class texts being fairytales.

Our main objective will be writing 'perfect sentences' – capitals, finger spaces, full stops, sounding out using our phonics, and accurate letter formation. We will also be doing some group guided reading sessions, alongside listening to the children read individually.

Art

Drawing – this term the children will be practicing their mark making both indoors and outdoors. They will be drawing and sketching in black and white and taking inspiration from the artist Keith Haring to produce their own final piece of pop art.

Maths

This term will start with number and place value – we will be reading and writing numbers to 10, ordering forwards and backwards and using a number line. We will also be thinking about 1 more and 1 less.

Then we will move onto addition and subtraction, learning how to use a part whole model and cementing our knowledge of number bonds.

P.E.

P.E will be happening on Friday afternoons with Miss Attewill and Thursday afternoons with the sports coaches so please make sure your child comes in their kit. The focus this term is ball skills and hockey.

Our Local Area

Autumn term 1

Science

Mini beasts in nature – In this topic we will be using our outdoor spaces for learning, to discover similarities and differences. We will be exploring classification within the insect world. This will be brought to life by the children creating their own mini beasts out of junk modelling and a “bug mug”!

RE

Our big question this term is – why do most Christians call God creator?

PSHE

We will be focussing on “me” and relationships. We are going to read the colour monster and talk about our emotions.

Computing

We will explore online safety, sorting and grouping and understanding tech around us.

Geography

Our local area – In this topic we will explore the village of Warborough. We would like to walk our local area as a class family. Owls are going to be using the text Martha Maps It Out by Leigh Hodgkinson to inspire their own map work and ultimately create their own map.

Music

This term we will be learning pulse, rhythm and pitch. We will also be exploring a musician of the month.
